Camoplast Tracks

#1 In Tracks

Going back to its origins under the Bombardier banner in 1958, the Camoplast Track Systems Group has designed and manufactured more than 4 million snowmobile rubber tracks. Camoplast rubber tracks keep improving with each new design to deliver industry leading product performance at speeds over 120 miles per hour.

How To Calculate Track Style And Track Dimensions

1. Measure the width (between the centre of the drive teeth) for the pitch.
2. Count all drive teeth or windows on track for a total amount.
3. Measure the lug height of your track.

Example: $2.52 \times 48 = 121''$ (pitch) \times (amount of teeth) = (length)

Clip Configurations

- **Every 3rd:** Clipped and punched every 3rd
- **Fully:** Fully clipped and punched
- **Pace 2:** Fully punched, clipped every other
- **Pace 3:** Fully punched, clipped every 3rd

TRACKtion Control System

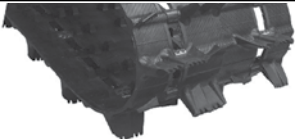

Note: All part numbers ending in the letter "H" are TRACKtion Control System tracks.

Camoplast, is committed to filling your boots with every advantage possible. The TRACKtion Control System is all about that. Performance made easy. Pre-Drilled tracks deliver many benefits. No measuring, no guess work, a warranty — and when you're not drilling, you got more time to ride. Camoplast — makin' it easy so you can go hard!

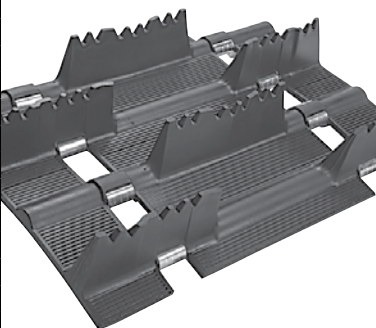

Mountain

The vertical challenge requires gravity defying pull to reach the high mark, while the boon ducker needs precision handling to carve the lines. The mountain offers a ride unlike any other, which is why Camoplast offers a variety of tracks that perform in the deep snow unlike any other. In the mountains, the Fun Factor is huge and the bragging rights are oh, so sweet! For climbing, carving, or floating, choose Camoplast — because your buddies can be so nasty!

Camoplast Tracks

Ice Tech Series

Camoplast delivers traction with the all new revolutionary Ice Control Enhancement Technology series of tracks. A turn key solution to performance gains and safer riding with confidence from Camoplast, #1 in traction.

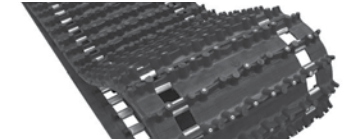

The new **SHARP TIP STUD** design utilizes a pointed cone-shaped carbide tip in place of the previous cylindrical tip. The "sharp tip" also protrudes farther from the stud body than on previous Camoplast lug stud designs. The result is easier and deeper penetration of ice or hard pack snow.

SLP Track/Hifax Anti-Wear Pads

These new wear pads reduce drag and wear on the Hifax. Designed for the new Polaris and Skidoo long tracks that are not equipped with windows or track clips on each cross bar. Without these anti-wear pads you will have higher Hifax temperature, more drag and sometimes rubber deposits on the Hifax. Eventually damage to the track is also possible.
