ITP 489

- The tire of choice for enthusiasts wanting a smooth ride.
- Round profile enhances steering characteristics.
- Combines high traction, good shock absorption and excellent stability.
- AT489 rear features proportionally spaced bar lugs to provide increased traction.
- OEM for Polaris and Arctic Cat.

Mudlite XTR (Extreme Terrain Radial)

- The industry's first **Extreme Terrain Radial** tire
- Results from some of our most extensive research & development efforts ever
- Combines the award winning technology of our Mud Lite & 589 M/S to produce the smoothest riding mud tire on the market today
- Super-aggressive tread design features deep, angled, grooved lugs to achieve an exceptional level of traction
- Light in weight yet still 6-ply tough!
- Two diameters provide you with the ability to tailor a tire choice to your specific riding requirements. The 12-inch option is ideal for primarily muddy conditions, offering better flex & more flotation. The revolutionary 14-inch model is an excellent all-around trail/mud choice, with its lower-profile sidewall resulting in reduced flex & a dramatic improvement in handling & rider confidence
- Radial construction means the Mud Lite XTR rides smoothly & finds more traction than a bias-ply tire because of a larger contact patch. A radial tire's footprint actually grows under load!

Mudzilla

- Raised outline white lettering
- Massive tread bars, give the maximum traction in mud and a smooth ride on hard pack surfaces
- Specifically designed tread pattern constructed to flex more in mud accumulating areas
- A full 1.5 inch of tread depth
- 6 Ply rating for worry free puncture resistance
- Rim guard for maximum protection
- Reinforced carcass ridge (RCR) technology delivers strength, reduces weight and sheds mud
- Step-down tread pattern adds to the lug strength
- Deep shoulder wrapping tread bars give the traction needed to pull through deep ruts.

K538 Executioner

- Designed to meet the demands of the most aggressive 4x4 riding terrain.
- New tread designs for deep-down traction in the muddiest of conditions.
- Reinforced knobs to reduce knob roll over at low pressure; better riding comfort and increased tread life.
- Dimple-tread surface for improved traction on dryer conditions.
- New 2+2 casing for increased puncture resistance and improved handling.
- New rim saver feature for protection against rock and rut damage.

K770 Southwick

- Perfect for sand and mud.
- Tall knob depths for deep bite.
- Knob base features large radius supports that lessen chance of rollover in softer areas with harder bases.
- New and improved tread compound supports tall knobs for longer tread life and quicker warm-up on cement start pads.
- Self-cleaning tread, even at lower speeds.
- Improved sidewall stability at low pressure with new inside casing structure.

K771 Millville

- Designed to meet the famous "Millville" mixed terrain.
- The unique dual rotation tread pattern allows for a wide range of applications from "Millville's Gravity Cavity" loam to loose soil over hard base.
- Reinforced knob base for excellent durability.
- New factory style racing tread compound for high grip on soft surface with a hard base.
- New lightweight casing ply material for reduced unsprung weight.

Dunlop Qualifier

Dunlop ushers in a whole new era of ultra-high radial sport tire performance with the introductions of the all-new Qualifier. Also known as the Q, this remarkable DOT-spec Supersport tire brings true racetrack-level performance to the street. The Q is the successor to the Dunlop D208ZR, the best-selling sport bike tire in the US, and it elevates all aspects of performance while maintaining the D208ZR's consistent, sure-footed all-weather handling.

- Use of the latest tire compounds allow a significant increase in land area in the tread pattern for improved grip while maintaining wet-weather performance equal to the D208ZR
- Advancements in belt design and tire construction significantly reduce unsprung weight, thereby contributing to quicker acceleration and enhanced steering characteristics
- Next-generation cosecant-curve tread pattern allows the driving and braking forces to remain aligned properly under cornering conditions
- Variable-pitch front tire pattern reduces frequency generated noise and vibration
- The stickier Qualifier heats up faster yet carries no more carcass heat than the D208ZR to promote equivalent tread life despite delivering a higher level of performance and confidence-inspiring handling.

Roadsmart Sport Touring

- Roadsmart is a premium radial tire intended for today's high-performance sport-touring motorcycles
- Multi-compound rear tire incorporates a long-wearing compound in the centre of the tire tread and a lateral-grip compound on the shoulder to maximize cornering performance and provide class-leading grip and feel.
- Tread pattern features Dunlop's cosecant-curve design and wears evenly over the life of the tires
- Deep, long lateral grooves evacuate maximum amounts of water in both straight-line and cornering conditions
- Micro-sized carbon particles improve dry grip under acceleration, and wet grip is improved with a special silica additive
- Qualifier-like profile ensures maximum contact area when cornering
- Rear tire features Dunlop's Jointless Band (JLB) continuously wound tread belt to ensure consistent tire diameter in all operating conditions

D616

- Dunlop's D616 is a radical new sport radial for the mean streets, with the looks and performance to run anywhere
- Innovative tread pattern sports and extremely aggressive look that is a direct descendant of a wettrack road racing tread design
- Cool-running tread with superior grip characteristics also provides excellent cut- and wear-resistance
- Front tire incorporates Dunlop's aramid breaker tread reinforcement and radial casing technology to provide excellent steering response and cornering stability
- Dunlop proudly introduces the new D616, a hybrid sport radial tire that merges the leading technologies of three proven Dunlop designs into one high-performance package. This innovative amalgamation of cutting edge design, construction and production techniques creates a new genre of tire that reflects Dunlop's extraordinary capacity to create products that are greater than the sum of their parts.

D205 Sport Touring

- Combines sporting capability with extended mileage
- Tire tread pattern has large blocks in centre to improve dry grip, wear resistance; shoulder area has high rubber-to-void area for excellent wet grip while cornering
- Jointless Band Construction (JLB) gives smooth handling and precise footprint
- The ideal tire for sport riders who take their machines on longer rides
- Blackwall
- Z-rated for speeds up to 149+ mph

D205 for Harley-Davidson

A new size 140/75R17 67V front and a 200/55R17 78V rear will be fit on some 2006 Harley-Davidson models and Dunlop has these in D205 patterns. These new D205 are radial tires, but they are V-speed rated and made especially for the new Harley models. The 140/7075R17 67V front tire is OEM on the new Screamin' Eagle Fat Boy, and the 200/55R17 78V rear fits that bike and the Softail Standard, Softail Custom and Night Train.

GT501 Sport Bias

- Built on the success of Dunlop's K591 sport tire, the new V-rated GT501 features bias-ply construction and incorporates a radial-style tread pattern for contemporary styling and a larger footprint
- An optimized profile creates a larger contact patch for increased cornering confidence, with smooth side-to-side transitions
- Increased tread-to-void ratio delivers superior grip in dry conditions, with no loss of grip in wet weather
- Increased centre tread depth provides improved wear characteristics and enhanced water clearance
- Improved rear compound increases wear resistance for longer tread life

Elite 3

- The new E3 tread pattern provides class-leading wet-pavement performance, even while riding through large puddles of standing water
 - New tread pattern is not affected by rain grooves, steel bridge decks or tar stripes, resulting in less front-end hunting and more consistent feel
 - The E3's sport-derived profile provides a livelier response in turn transitions and a solid feel through turns for confident cornering
 - The bias-ply Elite 3 features a new profile modelled after the shape of modern radial-construction tires and shares many of the same benefits
 - The load capacity of the E3 rear tire for the Honda GL 1500 is increased to 992 pounds for greater carrying capacity
- Dunlop's new series of the E3 rear tire for the Honda GL 1500 is increased to 992 pounds for greater carrying capacity

Dunlop's new series of Elite 3 tires comes in a wide range of sizes, including radials for all the big Hondas, a new wide tire and most popular bias-ply sizes previously found in the 491 Elite II

The radial E3 is designed for each tire size to work on all motorcycle fitments, making it easier to stock fewer tires while covering more bikes

Sport Bias/Cruiser/ Touring

Because Dunlop is the only manufacturer building motorcycle tires in America, they have a firsthand understanding of the many needs and priorities riders have all across the country. At Dunlop, they continue to refine and innovate — an attitude of progress that produces the most advanced tires in motorcycling, whether for sport, touring or cruiser use.

491 Elite II

- The 491 Elite II has remained the top choice in the touring market for years, thanks to its touring load-carrying capacity and remarkable long distance durability.
- Hi-speed rating, high load carrying capacity
- Excellent wet grip
- Front tire has tread pattern similar to rear and resists cupping for uniform wear
- Improved high- and low-speed stability

Dunlop/Harley Davidson Co-Branded Tires

Harley Davidson motorcycles began rolling off the Motor Company's Assembly line on Dunlop/Harley-Davidson co-branded tires in July 2000 at the start of the company's 2001 model year production. This innovative program is a first in the motorcycle industry, and furthers Harley-Davidson's commitment to Dunlop, the industry leader in Motorcycle tire sales. Dunlop's D401, D402 and K591 are included in the new Dunlop® Harley-Davidson® tire series. All tires in the series feature the name "Harley-Davidson®" imprinted in raised black letters.

D402 Series *Touring tire for Harley Davidson® Motorcycles*

- Made in the USA and the only brand fully approved by Harley-Davidson®
- Computer optimized tread pattern and material for excellent handling in wet and dry conditions
- Minimizes cupping
- Classic custom style
- Available in blackwall, single white stripe styling, and new wide white wall

D404 OEM Replacement

- OE replacement for many of today's popular big-bore cruiser bikes
- Tread pattern is designed for less sensitivity over rain grooves
- Inflated profile design provides smooth handling and cornering ability
- Wide profile maximizes tire contact footprint for longer mileage potential
- Bias-ply tire

K657

BRIDGESTONE

S11 – Most Popular Street Tire

- Dual Tread Construction. Resilient centre rubber compound delivers high mileage and low rolling resistance while shoulder compound delivers sport quality traction when cornering.
- 4-Ply casing, incorporating insert piles, a refined belt technology that helps keep the tire round and cool even at top speeds.
- Zig-zag and angled outer grooves (front & rear) provide wet-weather performance by throwing water to the sides, yet still resist rain-groove wander.
- Balanced wear characteristics maintain tire profile.
- Available in raised white or black lettering.
- Tubeless (with tubetype rims, tubes must be used).
